## **China XLX Zhengzhou R&D Centre Was Successfully Launched**

(20 June 2022, Hong Kong) China XLX Fertiliser Ltd. (“China XLX” or the “Company”) (HKSE: 1866.HK) is pleased to announce that on 18 June 2022, the opening ceremony of Zhengzhou R&D Centre of its subsidiary, Henan XLX Fertiliser Co., Ltd., was successfully held in Zhengzhou.

China XLX Zhengzhou R&D Centre Was Successfully Launched

Gu Chaohui, Chief Engineer of Henan XLX Group, and Su Dong, Executive Vice President of Henan Petrochemical Association, inaugurated the ceremony. The main research fields of Zhengzhou R&D Center include chemical technology research, technology achievement transformation, new fertiliser product technology research and talent incubation etc. Through technical research, project evaluation and result transformation, the R&D Center will collaborate with scientific research institutes and universities to establish a strong cooperation base connecting industry, academia and research, thus, to strengthen its technological innovation capabilities. Relying on the geographical advantage of locating at the provincial capital city, the center is an incubation center for high-end technical talents. It will be able to attract and cultivate

top talents for high-quality development of the Company and to enhance the Company's core competitiveness.

As a new starting point for China XLX to deploy R&D centers in different places, Zhengzhou R&D center will give full play to its geographical and resource advantages, attracting more excellent professional and technical talents for the Company. The center will be used to carry out the research on chemical fertilisers and other new technologies. The research on fine chemical, pharmaceutical chemical, boron chemical and other industries will be improved, and the conversion of process design package of technological research results will be strengthened.

**Mr. Liu Xingxu, Chairman of China XLX**, pointed out that Zhengzhou R&D Center will provide a strong technical support for improving the Company's core competitiveness, while promoting the Company and industry's technological progress. It will steadily energize China XLX's high-quality development.
